## **ASSOCIAÇÃO BAOBÁ**

Throughout our volunteering in Sao Tomé and Príncipe in 2022, we created strong relationships with the community where we worked. We understood that the majority of young people found themselves in a different situation from what we were used to. Furthermore, we realized that there was no motivation from the population to develop and create businesses that could contribute to the growth of the country, using its own resources.

This is when the idea to create BAOBÁ was born, a non-profit organization, with the goal to be the bridge between the population and the opportunities that the country offers.

We want to fight the early school dropout, the lack of vision and entrepreneurship, and finally, the social and environmental problems in the country.

We believe in the population of São Tomé, and in their capacity to contribute to the development of the country.

BAOBÁ is a tree that symbolizes the strength and resistance of the African people. It's considered a sacred tree.

### **How can we help you?**

- Helping you find the course or training you want;
- Providing information on how to apply to universities and training centers;
- Supporting while applying for scholarships;
- Supplying psychotechnical tests to help you decide which course or training is best for you, taking into account your abilities.
